Detailed Syllabus	Periods
<p>Note:</p> <p>The syllabus and the Term- work to be done during semester I and Semester II is given together. Individual Instructor for the course is to design the jobs for practice and demonstration and spread the work over entire two semesters. The objective is to impart training to help the students develop engineering skill sets. This exercise also aims in inculcating respect for physical work and hard labor in addition to some amount of value addition by getting exposed to interdisciplinary engineering domains.</p> <p>The two compulsory trades (Sr. No. 1- Fitting and 2 - Carpentry) shall be offered in separate semesters.</p> <p>Select any four trade topics (two per semester) out of the topic at Sr. n. 3 to 11. Demonstrations and hands on experience to be provided during the periods allotted for the same. Report on the demonstration including suitable sketches is also to be included in the term – work</p>	
<p>1. Fitting (compulsory)</p> <ul style="list-style-type: none"> • Use and setting of fitting tools for chipping, cutting, filing, marking, center punching, drilling, tapping. • Term work to include one job involving following operations : filing to size, one simple male- female joint, drilling and tapping 	30

2.	Carpentry (compulsory) <ul style="list-style-type: none"> • Use and setting of hand tools like hacksaws, jack planes, chisels and gauges for construction of various joints, wood tuning and modern wood turning methods. • Term work to include one carpentry job involving a joint and report on demonstration of a job involving wood turning 	30
3.	Forging (Smithy) <ul style="list-style-type: none"> • At least one workshop practice job (Lifting hook and handle) is to be demonstrated. 	15
4.	Welding <ul style="list-style-type: none"> • Edge preparation for welding jobs. Arc welding for different job like, Lap welding of two plates, butt welding of plates with simple cover, arc welding to join plates at right angles. 	15
